The first of these is the fact that the  
 population of the country is increasing  
 rapidly. This is due to a number of  
 causes, the most important of which  
 are the following: (1) the increase  
 in the birth rate, (2) the decrease  
 in the death rate, and (3) the  
 immigration of people from other  
 countries. The second of these is the  
 fact that the country is becoming  
 more and more industrialized. This  
 is due to the fact that the country  
 has a large number of factories and  
 mills, and that the people are  
 becoming more and more dependent  
 upon these for their livelihood. The  
 third of these is the fact that the  
 country is becoming more and more  
 urbanized. This is due to the fact  
 that the people are moving from the  
 country to the cities in large numbers.  
 These three factors are all contributing  
 to the rapid growth of the country.  
 The fourth of these is the fact that  
 the country is becoming more and  
 more developed. This is due to the  
 fact that the country has a large  
 number of cities and towns, and that  
 the people are becoming more and  
 more dependent upon these for their  
 livelihood. The fifth of these is the  
 fact that the country is becoming  
 more and more civilized. This is  
 due to the fact that the people are  
 becoming more and more educated,  
 and that they are becoming more  
 and more interested in the things  
 of the mind. These five factors are  
 all contributing to the rapid growth  
 of the country.
